Scientist - T Cell Experience

Zelluna Immunotherapy is an exciting and dynamic start-up based in Oslo, and, specializing in T Cell Receptor (TCR) cell therapies with a distinctive approach. The company is developing TCR guided Natural Killer cells (TCR-NK) as an allogeneic off-the-shelf cellular treatment option for solid cancer patients.

Our vision is to build a science-led company that delivers on these medicines.

We are seeking an experienced scientist with experience in T cell immunology to support the development and expansion of our TCR-NK platform. The successful candidate will be passionate and excited by our approach and is someone who thrives in a continuous learning start-up culture as well as being dedicated to working with a team to deliver on our collective purpose.

Key Responsibilities

- To develop T cell cloning methods for TCR discovery
- To initiate, lead and execute laboratory work to advance company objectives
- To offer insights and expertise on technical elements and direction of experiments
- To collaborate closely with Zelluna academic and commercial partners
- To keep abreast of technical and theoretical developments in allogeneic cell therapies; to provide guidance to others within the team as well as new members of staff on scientific and technical direction

Basic requirements

- A PhD in Cellular Biology, Molecular Biology or a related discipline
- Preferably 2 years post PhD relevant life science experience T cell immunology, industry experience would be an advantage
- A strong understanding of immunology and experience in T cell biology
- Expertise in working with human PBMCs, T cell-based assays (e.g. ELISA/ELISpot, flow cytometry, cell sorting, cancer cell killing etc.) is a requirement
- Expertise in generation of dendritic cells and molecular biology is strongly preferred
- A proven ability to assimilate data and findings from multiple sources to advance programmes
- An appetite to work in a start-up company with a “roll your sleeves up” mindset
- Full time position, based at the company’s headquarter in Oslo, Norway

We are on an exciting journey - join us, so together we can build the science, shape the culture and make a difference to the lives of cancer patients.
